*"The best camera is the one you have with you." —Chase Jarvis*

Learn how to craft creative, expressive images using nothing more than your smartphone!

Join award-winning California-based smartphone photographer, Charles Needle, in this fun, educational 3-hour workshop. Learn some of the technical aspects of smartphone photography — including equipment, accessories, workflow, and printing considerations — as well as several hidden features built into your smartphone camera.

Charles will cover basic camera operation and demonstrate the use of several helpful shooting apps, including Camera+, Average Camera Pro, Slow Shutter and more. Then, through a series of "live" demonstrations with his phone projected on a screen, Charles will show you step-by-step methods to help you magically translate your creative vision into pixels. He will show you how to use basic editing apps, such as Snapseed and Touch/Retouch, as well as more advanced compositing apps such as Image Blender, Autopainter, Distressed FX and many more. (This workshop will be geared primarily toward iPhone users; however, Android users will also benefit greatly from the Snapseed demonstration alone!)

You'll leave with an expanded creative vision, new ideas, and all the necessary tools and skills to make artistic, jaw-dropping smartphone images.

*Special Note:* Charles is offering this workshop at a severely reduced fee, available exclusively to PSA members who have registered for the Southern California Roundup Chapter annual event. The material covered in this half-day workshop is normally presented as a 2-day class costing more than \$400!
